

Borhan Rahimi

Observability Platform Engineering Intern

San Antonio, TX | (210) 799-8977 | rahimi.borhan2000@gmail.com | GitHub | LinkedIn

SUMMARY

Software engineer with experience in enterprise observability and full-stack development. Currently supporting Costco IT's Observability Platform Engineering team with Dynatrace, DQL, dashboards, monitoring, and platform automation. Experienced with React, TypeScript, REST APIs, SQL/NoSQL databases, and Docker.

EDUCATION

University of Texas at San Antonio (UTSA)

May 2026

Bachelor of Science in Computer Science | GPA: 3.53

Relevant Coursework: Data Science, Databases, Design & Analysis of Algorithms

EXPERIENCE

Observability Platform Engineering Intern — Costco IT

Jun 2026 – Present

Issaquah, WA | On-site

- Support enterprise monitoring and observability solutions across Costco IT.
- Use Dynatrace to analyze application performance, infrastructure health, logs, distributed traces, and business events.
- Develop dashboards, notebooks, and DQL queries that improve operational visibility and troubleshooting.
- Collaborate on platform automation, integrations, and performance investigations that improve reliability and efficiency.

Software Engineering Student — H-E-B Digital

Aug 2025 – May 2026

Quest for Texas Best, University–Industry Project | San Antonio, TX

- Built reusable frontend features with React and TypeScript in a production-style team environment.
- Integrated FastAPI REST services and modeled PostgreSQL data with SQLAlchemy.
- Used Docker, GitLab, Jira, Postman, and pytest within Agile development workflows.

PROJECTS

MyGrocery — Full-Stack E-commerce Application

React, Express, MongoDB Atlas, Stripe, REST APIs

- Built authentication, product filtering, cart, delivery, discount, checkout, and order-history workflows.
- Designed REST APIs and integrated Stripe payments with detailed transaction calculations.

UTSA Student Course Planner

React, TypeScript, Node.js, MySQL, JWT, Tailwind CSS

- Developed course browsing, section planning, JWT authentication, and role-based admin workflows.
- Designed a relational model for courses, sections, terms, instructors, and meetings.

SKILLS

Observability: Dynatrace, DQL, dashboards, notebooks, logs, distributed traces, monitoring

Languages: TypeScript, JavaScript, Python, Java, C, SQL

Frontend & Backend: React, Next.js, Tailwind CSS, Node.js, Express, FastAPI, REST APIs

Data & Tools: PostgreSQL, MySQL, MongoDB, SQLAlchemy, Docker, Git/GitLab, Jira, Postman, pytest
